Total Lockout (Safety) Limited specialise in supplying a complete range of safety lockout equipment and facilities. Our safety lockout equipment will ensure the integrity of your maintenance activities thereby reducing the likelihood of industrial accidents.

Our complete range of safety lockout applications covers all manner of commercial and industrial environments. From electrical isolation lockouts to cable and value lockouts, Total Lockout has the products to ensure that safe working practices are consistently adhered to.

Here at Total Lockout we believe in the integrity of all of the safety lockout equipment that weâ€™re able to offer our clients. After all safety is paramount for anyone that works in a potentially hazardous environment. Our products are expertly designed to ensure the integrity of your premises.

The greatest risk to safety lockout isolation is the presence of a rogue key. Such keys can be used to remove a padlock and to reinstate power, potentially opening your premises up to all the hazards that come with unauthorised and uneducated people stepping for into dangerous areas. To negate the risk of any unforeseen events we take all possible security measures to prevent unauthorised keys finding their way into circulation.

The safety lockout procedures that we advise include the following:

We maintain that all keys or locks differ for every single one of our customers. The safety padlocks that we supply should only be accessed using one key. In addition, the safety lockout padlocks keys that we supply cannot be duplicated at traditional high street key-cutters and that the safety padlock are key retaining when the shackle is open.

Should you wish to discover any more information regarding the safety lockout equipment that we can provide, from padlocks to value lockouts, signs and tags and secure key cabinets then you need only come and visit us online at: www.totallockout.com. Here you will find all the information that you need to decide which safety lockout procedure is right for you, and you can even shop online from our range of products.
