Stock up on Enamelled Copper Magnet Winding Wire by [Mary Porter](#)

Article published on July 13th 2012 | [Business](#)

For many tradesmen Enamelled Copper Magnet Winding Wire is an essential item, used on an almost daily basis. Enamelled Copper Magnet Winding Wire is copper wiring coated with a thin layer of insulation. This insulation level is extremely thin on Enamelled Copper Magnet Winding Wire and, depending on the specification of the wire, it may involve up to three layers of insulation. You will often find that the insulation on Enamelled Copper Magnet Winding Wire is made from polymer film. If more than one level is used, different compositions of polymer may be used as this gives a sturdy and tough insulating layer; an essential part of Enamelled Copper Magnet Winding Wire. This level of insulation means Enamelled Copper Magnet Winding Wire can be used at extremely high temperatures; often these temperatures can creep up to 250 degrees.

Enamelled Copper Magnet Winding Wire can be used for a variety of purposes, making it an extremely popular material. It is often used in electric motors and speakers, as well as hard disk actuators and transformer coils. In fact, Enamelled Copper Magnet Winding Wire is often considered to be an essential piece in any handyman's toolbox. As well as the insulating layer, the tight coils found in Enamelled Copper Magnet Winding Wire make it a very useful material in the building and construction trade.

When you are looking to purchase Enamelled Copper Magnet Winding Wire, it's important to look for certain characteristics to ensure you are buying the best possible Enamelled Copper Magnet Winding Wire. Durability is crucial. It's important that your Enamelled Copper Magnet Winding Wire can last the distance, without fraying or perishing. Your Enamelled Copper Magnet Winding Wire also needs to be pliant and malleable; ensuring it's easy to handle and work with. Make sure you choose the right diameter for your Enamelled Copper Magnet Winding Wire – sizes vary and often your job will require a specific width to be used.
