Tankless Water Heater: Blended with Innovative Features

by James

Article published on December 28th 2011 | Business

Tankless water heaters are high in demand these days because of its several advantageous features. They work very simply and come with multiple functions once the user opens the control tap. They are very much convenient to use and found very economical compared to other water heaters.

These types of latest water heaters use a heat exchanger to raise the temperature. Addition of a device like heat exchanger, this water heater conveys heat one component of the system to another. The heat get generated in this case and then come out of your valve. As soon as the users turn on the hot water tap, the incoming water which is in cold condition that time start circulating through the activated exchanger and then heats the water to the desired temperature.

There are several advantages of tankless water heaters. Letâ€™s have a look on those one by one:

=> Cost efficient â€“ A tankless water heater easily save a lot of money on your monthly utilities, cutting as much as 20% off the cost of heating the water in your house.

=> They donâ€™t waste â€“ On-demand water heaters eliminate standby losses. Hot water is never left to cool in the tank or in pipes.

=> Durable â€“ This type of water heater wonâ€™t corrode and therefore their lifespan is 5 to 10 years longer compared to other types of water heaters.

=> Compact and convenient - Tankless water heaters are compact in design and can be easily positioned anywhere in a home. Remote controls feature provide more ease to the users.

=> Never run out - With a tankless water heater the users get an unlimited supply of hot water. One need not to worry about cutting your shower short as other member of the house might be also in line to take a shower.

There are two types of tankless water heaters available in the market:

Point-Of-Use Heaters â€“ This is a smaller unit and thatâ€™s the reason heat water only for one or two valve or fixtures such as your kitchen sink. They are electric operatable and because of their small size easily fit under a cabinet or in a closet. They are easy and beneficial to use because of well installed fixture.

Whole-House heaters â€“ This larger unit is gas fired or electric and designed to serve entire house, apartment, condo, or cabin etc.

Tankless water heaters are a feasible and easy way to save thousands of dollars over their lifetimes. They are not only long lasting but as well is easy to maintain if get any problem. Hiring a well qualified and licensed plumber is the wise idea.
