The advantages of using a Hand Sanitizer by Mary Porter

Article published on July 10th 2012 | Business

Using a hand sanitizer can provide vital protection from a wide range of germs and viruses and can help stop the spread of infections. Since the outbreak of various viruses like bird flu more and more people have been using a hand sanitizer on a regular basis to try and prevent them for getting such viruses. Germs, viruses and bacteria are very easily spread from person to person by hand. This can be through us sneezing, coughing and touching contaminated surfaces. If you have a virus then you may wish to use a hand sanitizer while you are ill to try and prevent you from contaminating anyone else with the germs. Many people now carry hand sanitizer with them in their car, handbag or briefcase and will use this throughout the day and especially before eating.

Using a hand sanitizer is very important in certain workplace environments. A wall mounted hand sanitizer dispenser is ideal for use in restaurants, cafes, bars, clinics, hospitals, dentists, kitchens and other workplaces where infection control is highly important. Using a hand sanitizer dispenser is common place in hospital settings now and visitors and hospital staff should all use hand sanitizer before seeing a patient and when they enter and leave the hospital building. This simple yet effective procedure will help to stop many common viruses, germs and infections from spreading.

The great thing about most hand sanitizer dispenser products is that you donâ€™t need water to use it which makes it portable. Most hand sanitizer products are alcohol based and come in portable units or hand sanitizer dispenser units for commercial use. Alcohol effectively kills many common germs, viruses and bacteria such as TB, HIV, Herpes simplex virus, Hepatitis B and C, flu viruses and many diarrhoea causing bacteria and this is why it is used in hand sanitizer products. Portable hand sanitizer dispensers are ideal for people who use public transport a lot and want to ensure they are kept germ free and they are also ideal for people who donâ€™t have regular access to running water to wash their hands frequently.
