The FOREX Tools from XE (Xenon Labs) by Julia Roger

Article published on March 19th 2012 | Business

OnlineFX tools are heavily in demand in the market. While one can assume that the demand is more among the traders and currency analysts, the travellers and international tourists also require these tools for some calculation purpose. After all, their requirement is large. Without proper currency conversion, they will face total difficulty after stepping into some foreign land.

The currency conversion tools available from XE (Xenon Labs) are considered the most reliable of all the ones available. The UCCâ„¢ from Xenon Labs is regarded to be the provider of the most accurate results, while speaking about conversion. In fact, the UCCâ„¢ is the first such currency conversion tool that came into existence.

The year of its launching was 1995. Once it launched in the market, it was greeted with overwhelming response from different market industries. Since then, this tool has been enjoying the top position among the FOREX traders and industry experts. The growth rate has been around 10% on a continuous basis.

An amazing fact about XE universal currency converter tool is- it processed around 2.5 million calculations during the month of March, 1999. However, the number of page viewers is a bit more: itâ€™s around 4 million!

Xenonâ€™s UCC is used by a lot of other websites (under permission). Some of the renowned names include AOL, eBay, CompuServe, A&T, and Infoseek. There are around 130,000 registered users for Xenon. According to the recent survey, around 37% of the customers/users are importers and exporters who use the service for purchase and selling purpose.

Recently, Xenon has launched its unique software tool: Time Expenses Calculatorâ„¢. This tool is quite handy for the international travelers. Believe it or not but around 14,000 transactions were conducted during the first month of its release!
