Article published on June 7th 2012 | Business

The past records very clearly show that India is a country where in anything can happen any time! The earthshaking and epoch-making terror attacks of 2011 are one such example. These kinds of occurrences have made it very crucial and important for Indian citizens to update themselves and be aware about the latest India news.

In India news today has become global and thus it is of utmost importance that they show content which does not mislead the masses. Latest India news should aim to draw a bead on the issues of national and public importance like corruption, bribery, poverty, unemployment, illiteracy, population which will make the citizens aware of their basic rights and duties and this will help in making our nation's name count in the list of developed states instead of the developing states. This has been done to a certain extent by certain news channels by flashing such issues as India latest news on their channels. A latest survey by a news channel shows that the number of people living in the slums in India is more than the total population of United Kingdom; which is a matter of concern. However many news channels show baseless and insignificant celebrity gossips, their luxurious and lavish lives which misleads the masses to a great extent.

It is very important for the news to be of national importance because the whole of the nation sees it. Therefore TV channels, newspapers should make sure that issues that are projected by them as news should be well- accepted by the viewers and that it should help in the nation's progress. A daily dose of certain amount of entertainment is also acceptable as it refreshes the minds of people after a hectic and exhausting day at work.

However the main focus should be the country's development and progress and that it should get rid of all kinds of social evils like poverty, child labor, corruption, illiteracy, unemployment, population, etc. News prove to be the most strongest and powerful medium to drive away these social evils by waking up people from their sleep to improve the sad state of the nation.

There are people who want to make their contribution to help the nation in every possible way to improve its condition. More awareness needs to be spread among the people via India news channels so that more people take action in making India a better place to live.
