Tips to Maintain the Class of Your Windshield by Hale Kramer

Article published on April 27th 2012 | Business

The windshield is an essential part of your car as it keeps your car interior private and secluded from dirt and many other harmful elements. Furthermore, windshields prevent your car roof from caving in, as well as secure the air bag system to protect you from collision impact. According to a survey conducted by the National Highway Traffic Safety Administration, eight out of 10 windshield replacements arenâ€™t installed securely.

As a driver, itâ€™s important for you to check the safety features of your car, especially the windscreen, as itâ€™s considered to be an integral part of your protection inside your car. The windshield is usually made from sturdy materials such as laminated safety glass (polyvinyl butyral) and acrylic plastic to withstand force brought about by collisions or natural elements.

Keeping the windshield durable can be a hefty task, especially if you are a busy person. You have to check every once in a while the condition your car is in to ensure that the windshield has not sustained any cracks or damage. This article will provide you inexpensive tips on how you can maintain the quality of your car windscreen:

Prevent slamming of doors

Slamming of door can cause severe dings on your windscreen. Due to the intense impact caused by slamming, cracks will eventually form and spread throughout the affected area of your windshield. Itâ€™s best to handle your car with care every time you open or shut the door so that you wonâ€™t need a windshield replacement Reno residents trust.

Have it repaired promptly

If your windscreen is suffering from any type of crack, have windshield replacement Reno residents recommend.

Avoid the sunâ€™s harmful rays

Itâ€™s not only human skin thatâ€™s non-resistant to harmful ultraviolet (UV) rays, even your windscreen gets affected by them. Dire exposure to sunlight can shorten the life span of your windshield and can diminish its natural color. Itâ€™s best to park in shady places that have roofs and coverings to protect your car.

Avoid glass cleaners with ammonia

When cleaning your car, especially the windscreen and wipers, avoid cleaners that contain ammonia as it can damage the original texture of your windscreen, especially when youâ€™ve just had a Reno auto body has to offer installed. Follow these tips and youâ€™re sure to have a car with a long and happy lifespan.
