Try Being a More Energy Efficient Tenant in Your Edinburgh property by [Calum Rendall](#)

Article published on April 2nd 2012 | [Business](#)

Those who have been through the credit crunch recently in Edinburgh have changed their lifestyles to quiet an extent. This involves being more energy efficient. People who have gone through this phase have learnt that saving energy in their property to rent in Edinburgh every day can save them money. You will be surprised to know the amount of money that goes to waste just because you are not energy efficient. The article below outlines some simple tips, following them permanently will not only make your home more energy efficient but will also save you money and will also let you do your bit for the environment and future generations.

Switching off the main switch

You will be surprised to know that switching off all appliances from the main switch will save you around Â£30 annually. Just think about all the electrical appliances in your Edinburgh flats to rent or any other kind of property to rent in Edinburgh, which you have left on standby for years and years. You probably could have saved all this amount of money.

Insulating the walls and roof

You can lose up to half of your heat just because the walls and roof of your Edinburgh flats to rent are not insulated or are done incorrectly.

Use energy efficient light bulbs

Change the lights in your property to rent in Edinburgh to energy efficient light bulbs. These not only use less electricity but they also last longer.

Energy efficient appliances

Whenever you are buying a new electrical appliance, always ensure that it is energy efficient.

Use electricity cleverly

You must consider all your needs and requirements and functions accordingly. For example, wait for your dishwasher or washing machine to be full before turning it on. Always switch off the light when you are leaving the room. Putting on an extra jumper and turning the thermostat down will also help you in saving energy.

Stop overcharging

When using appliances like mobiles, MP3â€™s and ipods, ensure that you do not overcharge them.

Changing the shower

Having a bath instead of a shower will help you save around 30% on water bills.
