# UK Consulate Opens in Hyderabad, India by Kiran IVF

Article published on June 7th 2012 | Business

HYDERABAD, India â€“ February 29th , 2012 â€” Sai Kiran Hospital, a unit of the Kiran Infertility Center Pvt. Ltd.(KIC) based in Hyderabad India. In our continuous endeavor to update all Intended Parents across the Globe with the latest happenings in field of International Surrogacy and Cross Border Medical Tourism we would like to update the Parents about the Latest Development in KIC and field of Immigration and Exit Visa Stamping Formalities.

We continuously try to update ourselves with the latest happening in the field of Surrogacy in all parameterâ€™s Medical or Non- Medical and intend to provide better service to clients by reverse integrating all the related Medical and Non Medical Services in one Loop. Hence we have designed a Surrogacy Package that meets all the needs of Intended Parents, the only thing our Intended Parents need to take care is about catching a flight and coming to Hyderabad Airport. After landing we ensure that our Patient is taken care of. We are continuously improvising at our end to make the journey of our Intended Parents to Parenthood smoother, safe, shorter, informative and more fascinating and thereby an unforgettable experience.

Also as a change in process! From now, Intended Parents from United Kingdom travelling to take their babies back to their Home Country hopefully will not require to visit New Delhi for processing of passports or travel documents for their New Born.

Until Now Intended Parents from United Kingdom had to travel to Delhi to visit the High Commission in New Delhi to process for Citizenship and Travel Document for their New Born baby/ babies.

United Kingdom has announced about opening of its consulate in Hyderabad on Thursday 31st May 2012 making it the only country to have a consulate in all southern states except Kerala.

For now, the consulate â€“ to be headed by a deputy high commissioner - is expected to work out of a city hotel before it moves to a permanent address. The UK consulate would bring the city closer to realizing its London dream which has to otherwise route its visa applications through the consulate office in Chennai.

The consulate is set to place Hyderabad firmly on the global travel map, which the city has been figuring in over the last few years particularly after the international airport at Shamshabad came up. The city already has direct connectivity to UK with a daily British Airways flight to London. The flight reports more than 80% occupancy on most days, say official sources. Frequent flyers in the city hope that the consulateâ€™s presence in Hyderabad would connect city airport to more destinations in UK. Consulate offices often act as confidence boosters among travelers from their home nations, who feel comfortable visiting a city that has their consulate office. The consulate presence would also better people to people contact and an increased opportunity for state residents to avail of the various fellowships and scholarships of the UK government.

According to Dr. Samit Sekhar, Chief Embryologist and IVF & Surrogacy Program Director, Kiran Infertility Centre, this will be an added advantage to all the parents who will be travelling to our facility for pursuing various treatments for Infertility as hopefully they do no longer need to go to Delhi to procure Passports/ Travel Documents to their new-born, they will be able to get them processed here in Hyderabad and this will also help in reducing the time of stay for Parents Post Birth by approximately 3 to 4 days.
