Villeroy and Boch- a Brand Name in Ceramic Products Manufacturing from Germany
by [Julia Roger](#)

Article published on March 13th 2012 | [Business](#)

Villeroy and Boch is a world famous ceramic manufacturing company in Germany. It is headquartered in Mettlach, Germany. The company, Boch, began its operations in a small village in France in the year 1748. Francois Boch, the founder of this company, along with his three sons set up this company. Soon, the base was shifted to Luxembourg and until 2010, they ran a porcelain factory. The Boch headquarter was established in the year 1801 in Germany however the company merged with its competitor Nicolas Villeroy in the year 1836 when the owner of the former company decided to do it.

The group chairperson, Frank Goering, now runs the company. It is always better to rely on the experienced whenever making a purchase. The same is applicable for ceramics products. The company has more than 250 years of experience. Moreover, some of the craftsmen of this company are known to produce unique items. The best thing about this company is that it is still ready to take up new ideas and work on them. It can be rest assured that your search for ideal crockery would end here. However, you need to visit a reputed store to get authentic products.

Their latest range of product is the WMF cutlery. Your ceramic products collection is incomplete without this range. This is the best available product in the town. The company assures of its great quality products. The elegance of knives and spoons of this company gives an added beauty to the dining table. The products are made considering all the necessary aspects in mind. The price that the company charges for the products is worth the money in every sense. This can be surely said that you can never go wrong with the products from this company.
