Article published on June 20th 2012 | Business

Weigh up the cost of a Solar panel installation and you might wonder what all the fuss is about solar PV Essex. Is it really worth paying for a Solar panel installation, what incentives are there for this type of system? Well, since 2010 there has been one great carrot dangled in front of your nose and itâ€™s a scheme thatâ€™s designed to encourage domestic customers to have a Solar Panel Installation. called the Feed in Tariff (FIT) and itâ€™s a government backed scheme that pays customers who generate their own electricity. There are two ways you can make money with a Solar Panel Installation. The first is you are paid for any electricity you generate, even if you use it yourself, and the other is you can export excess electricity back to the national grid and get paid for that as well.

Now thatâ€™s a couple of great incentives for considering a Solar Panel Installation but why else should you think about solar power?

A Solar panel installation will reduce those energy bills

Thereâ€™s massive uproar in the UK at the moment, not only are we paying some of the highest prices for petrol and diesel, utility bills are forever on the increase as well. Have a Solar Panel Installation and youâ€™ll generate you own electricity saving a fortune on those pricey bills. A Solar Panel Installation will go a significant way in helping you to cut down on pricey house expenditure. Not only could you reduce your electricity bills using a Solar Panel Installation, you might just eliminate them altogether depending on how much electricity your system generates.

Youâ€™re no longer totally dependent on utility suppliers when you have a Solar Panel Installation from experts in solar PV Essex.

Think about the green issues

Rely heavily on utility companies for electricity and you are playing your part in eating away at the Earthâ€™s natural resources. Consider a Solar panel installation and youâ€™ll be doing your bit for the planet vastly reducing your carbon footprint. Homes that are fitted with a Solar Panel Installation arenâ€™t totally reliant on fossil fuels. They are self-supportive and the Solar Panel Installation provides them with natural power that has been harnessed from the sun.

Take an ecological stance and have a Solar Panel Installation, boost your green credentials with solar PV Essex. There are many great reasons to have a Solar Panel Installation so why not look a little closer at this green type of energy generation.
