What is the Art of Glass Manufacturing by Carol Moore

Article published on November 28th 2011 | Business

Hand blown art glass manufacturing is not an easy thing. Advanced optics model of glass and the hand blown paper weight glass objects are noted for its unique history. Even from the bloom of the industrial revolution till the improved economic conditions of this modern world the role of advanced optics/fiber glass/hand blown paper weights of glass is noteworthy.

The art glass manufacturing process and art glass painting objects have raised uniquely from its simple elegant model to the more advanced fashion featured designer models adding beauty par excellence to each of our desk tops in our offices as well as homes. Distinctive styles with well renowned branded names in plain art glass, vintage art glass, hand blown art glass, designer art glass both crafted by hands as well as machines can be seen in the global consumer markets. Chris Buzzini comments in the following manner as regards to the way art glass work is done by the skilled workers. He says, "the 'lamp working process' by nature, is a cumulative one, and allows an artist to build on his own ability and creativity." The creativity as well as the patience to bring out wonderful collection drives each skilled personnel to put out his/her best in the production of the art glass items. Virtual training is available for new guys especially those interested to join the apprentice ship of art glass manufacturing. There are many beginners who had begun to successfully create their own pieces of art work after attending the training session of the virtual classes.

The instructional videos enable the onlooker/student to have a better idea of how visually the art work is done in the glass. Usually the training takes place for few yearsâ€™. The apprenticeship on the other hand can be done only by those guys who have a real interest to pursue the course and finish it with qualified [European glass] professionals. Moreover the program which suits your needs like location, focus of the program and its career placement should be all considered by every student. The costs of the apprentice ships are also vital and it varies from art school to art school. At times the Art school needs the student to submit an art portfolio.

The choices of the art programs are also varied. It can be either an easy summer course or full fledged degree course but in case you have got an innate passion to master the European/Czech stylish glass models it is good to opt for A FULL course in regular mode. This would lead one to attain high levels of professional skills and one can gain enough confidence to master the skills to pursue a career in glass design work either in plain glass or in advanced optics models.
