When Shopping for a BlackBerry Enterprise Server: the Elements to Ponder by Samantha Cole

Article published on March 9th 2012 | Business

You may have already looked at the BlackBerry Enterprise Server (BES) Client Access Licenses (CALS) and knew about the benefits these give to businesses. The power of BES may make you think about its capabilities. Nevertheless, though the BES software's inner workings are new to you, what is important to you as a client is the legitimacy of the software.

Authenticity of BlackBerry Enterprise Server Client Access License Software. BlackBerry CAL software will not usually work unless they 1) are validated by the servers also owned by the maker, or 2) contain the needed Blackberry licenses. Once you've confirmed these two things, then you can be assured that the software you purchased is genuine.

When you have chosen to purchase BES software, a BES company have the ability to place your order automatically and send you the item electronically within one day to your BlackBerry. Some businesses can yield much quicker than that, but will require that you advise them if it is a rush order. Additionally, there is also BES businesses that admit purchase order in which payment can be made at a later period.

The Number of Licenses You Need to Purchase. Nevertheless, watch out for BES companies that obligate you to get a minimal number of licenses. Before you know it, you turn out acquiring more CALs than you or your business actually needs. It's best to look for a BES CAL company that will enable you to purchase just those licenses that you will need, and then let you to upgrade to a higher number of licenses should you decide to do so in the future. In brief, find a company that won't give you any reason to spend more than what is needed.

Setting Up and Assistance. Setting up BES CAL is fairly quick contrasted to some several other server software. Generally, the server installation is automated. Some companies supply remote installation of services. No matter what the size of your business establishment, this can save you from many headaches. Most BlackBerry Enterprise companies can guarantee that your server software will be up and working on the same day.

Trial Editions Available Online. Some server CAL companies provide you the software's trial version which can last between 30 and 60 days. This grants you to see if the IT department of your business can really benefit from it. Downloading the trial version is as easy as a click of a button on their official websites.
