Where to buy Tiles in Cairns??? HELP!

Looking for a reputable tile supplier in Cairns? Look no further â€“ Majer Tiles have a tile solution for whatever project you are doing, big or small.

Searching for any type of tiles: floor tiles, wall tiles, kitchen tiles, mosaic tiles etc can be a stressful and exhausting experience. Why not let the helpful team at Majer Tiles help you?

Majer Tiles have been a trusted tile supplier in Queensland for the past 40 years. Originating in Cairns, Majer Tiles have been trusted tile experts and have a stellar reputation for stocking some of the most beautiful floor tiles, wall tiles and bathroom tiles in Australia.

Majer Tiles hand pick each and every single tile that you will find in their showroom and spend time yearly overseas researching the newest trends in tile design.

Floor tile, wall tiles and mosaic tile trends change significantly each and every year which is why Majer Tiles invest in overseas research on a regular basis.

Majer Tiles work closely with overseas manufactures and have been developing wall tiles, floor tiles and bathroom tiles that are exclusive to Majer Tiles and cannot be found in any other Tile Store in Australia.

On a recent overseas trip, Majer Tiles discovered that the current tile design we have seen in Australia for the past decade is slowly changingâ€¦.particularly with wall tiles.

For floor tiles, people are generally going for larger tiles. Larger floor tiles are really anything from 450mm X 450mm right up to a much larger format floor tile of about 600mm x 600mm. You can also find floor tiles in sizes a bit larger example 400mm x 800mm, but the thing to keep in mind if you are interested in this size floor tile is it would be more expensive to lay.

Tile Suppliers in Australia will generally hold a large selection of floor tiles that are about the 450x450 dimension. This format floor tile is quite common and very popular as there is such a huge variety available, and they are a relatively easy floor tile to have installed.

Wall tiles for many many years have been predominantly white or off-white in colour and available in many sizes. When researching bathroom tiles, if you look at any bathroom tile design that was used in the past 10 years, you will see that the trend was to have plain white on the walls (either gloss white or matt white) and the base colour of the room in the floor tile.

Recently, many interior designers and colour consultants are recommending the use of coloured wall tiles. Introducing a bit more vibrance and life into a bathroom can set your home apart from the rest.

An easy way of introducing this concept is by using floor tiles as wall tiles. What we mean by that is using a tile that can be used as a floor tile, on the walls of your bathrooms.

Tiles that were designed to be floor tiles can be used on either the floor or the wall.

Tiles that were designed to be wall tiles, can only be used on the walls. The reason being is that they are generally made of a softer material that is perfect for use on walls, but they would not be able to withstand foot traffic in your home.

Majer Tiles are the Tile Design experts. You come to us with your vision or inspiration â€“ and we can bring that vision to life right in front of your eyes.

Our trained staff have been skilled to be able to produce hand sketches of what your dream bathroom could look like, taking out all of the guess work in choosing tiles.
