Whisper Pumps has a large selection of some of the most efficient submersible pumps by Julia Roger

Article published on December 15th 2011 | Business

Founded in 1994 Whisper Pumps has grown to become one of the UKs leading suppliers of pumps and equipment for a diverse range of applications. Here at Whisper Pumps weâ€™re not tied to any specific manufacturer which allows us to source the leading pumps in the industry. From submersible pumps and borehole pumps to expansion vessels ultra violet sterilizers our products are pioneering examples of efficiency and durability.

Here at Whisper Pumps we guarantee the best possible prices for all of our submersible pumps, and indeed across our range of products. The electric submersible pumps that weâ€™re able to supply have a hermetically-sealed motor that is close coupled to the body of the pump. The primary advantage of these pumps is that they prevent pump cavitations. These submersible pumps push the fluid to the surface and can be used in a number of different applications.

Our selection of submersible pumps includes the Ebara Best 2-3-4-5. These submersible pumps are manufactured from AISI 304 stainless steel and feature double mechanical seals to ensure long life and reliability. Suitable for a diverse range of purposes from draining wells, lift shaft emptying to irrigation and water displays these pumps are amongst the foremost available in the industry today.

Alternatively, our range of durable and innovative submersible pumps includes the Lowara DIWA submersible pumps. Manufactured from high-grade AISI 304 stainless steel and for use in dirty water these pumps have a number of superior features. They work efficiently, even at temperatures of fifty degrees, have a maximum immersion depth of seven metres, and have a head range of up to twenty one meters.

If youâ€™d like to have a look at the range of submersible pumps, or indeed the other range of pumps and accessories that we have, or view our prices or shop online then come and visit our website at: www.whisperpumps.com.
