Article published on January 20th 2012 | Business

There are various reasons behind this question that why do we need to recycle empty toner cartridges? The first thing is that pollution is prevailing all over the place. Secondly we are in a state of carbon footprints. Thirdly hundreds of thousands of empty franking machine cartridges are being thrown away in landfills, lakes, streams and oceans every year in United States of America, Canada, Australia, United Kingdom and many other countries in the world.

The current data shows that almost Â£36,000,000 worth of aluminium is thrown in landfills, oceans, lakes, watercourses and scraps every year in UK, U.S among other countries in the world. 60% of the scratch that pitches in landfills could be recycled. 16% of the cash we spend on stock pays for packing that ultimately emerges as waste. Plastic materials thrown in landfills as waste are estimated to kill approximately 1,000,000 sea creatures every year in the world.

Over 55 million empty toner cartridges are pitched as waste in UK annually. I meant to say that arenâ€™t they shocking used toner cartridge facts for us? Therefore, it is need of time for all us to follow recycling cartridge job as quickly as possible. The fact of the matter is that cartridge recycling will help us to save our natural resources. There are many valuable natural resources due to which we are living in this planet comfortably as well as happily.

The most common natural resources are composed of mother earth, oceans, sea, lakes, streams, rivers, watercourse among others. Secondly toner recycling job will also help us to save our natural environment. The more you recycle the empty/waste and used toner cartridges the more we keep the environment green and refreshing. Another great aspect about the toner recycling is that we will be able to reduce the carbon footprints and CO2 generation.

By recycling used toner cartridges, we can certainly be able to mitigate environmental pollution considerably. Pollution creates several disorders i.e. anxiety, depression, trauma, hypertension, compulsive disorder, high blood pressure and fatigue. The more we recycle cartridges the more we stay away from pollution and its horrible impacts. As far as landfills we can certainly be able to reduce waste via cartridge recycling in UK and elsewhere.

Garbage and landfills are one of the biggest reasons of pollution and murky environment. Last, but not the least, recycle cartridges will help us to keep our mother earth, fertile lands and fields dirt free and deteriorated. One of the most important benefits of recycling used toner cartridges is that we can support the charities, social clubs, schools, handicapped organisations and local football teams.

Greentech has been playing a key role in recycling cartridges for cash in United Kingdom since 2000. They offer you UKâ€™s highest prices of up to Â£12 for your used empty toner cartridges. They are also helping Sakina Shifa Centre in, Lahore Pakistan in charitable cause. Therefore, if you want to serve the humanity in better way, donâ€™t hesitate to sell your empties here at Greentech.
