Article published on July 26th 2012 | Business

Today as we all know world is going through the phase of global warming and there is a need to bring revolution in every sector of industry to protect the world. One such revolution is taking place in plastic industry where non woven fabrics manufacturers are setting up the unit or industry as to protect the environment.

Non woven fabrics manufacturers are seeing the potential and growth in eco friendly fabrics which are widely used in many sectors of industries. Even the government of India, has banned the use of plastic bags so many industrialist are setting up the non woven fabrics manufacturing unit around Ahmadabad Gujarat to capitalize on the opportunity which has risen because of ban on plastics bags and materials.
