The enthusiasm to study some engineering subjects has been driven fiercely by the job prospects that are found in the country. These subjects are mostly related to IT, computer science, electronics and telecommunications. Information technology courses, from the above subjects has been the most demanded as students are entering into engineering colleges and getting admitted to these streams.

Students who are choosing this particular stream are hopeful of finding a job in the future, after passing out, in the IT and computer and software companies. Throughout the world, there is an increasing demand of IT professionals as computerisation is being done everywhere. IT and IT based industries are taking a large scale involvement in the economy of the country and are operating from a few cities in India, which have been rightly called as the IT hubs.

Hyderabad, Noida and Kolkata have established themselves as leading cities in India with various software companies along with other cities. Companies belonging to India and with their bases outside the country have picked up these cities for establishing their operations. Some of the notable organisations are HP, Accenture, Infosys, TCS, Satyam, IBM, Google, Amazon, Microsoft, etc, which are the bigwigs in IT sector.

Many of the jobs in these companies are of the entry level, due to which the jobs for freshers are found in plenty in the cities of Hyderabad and Kolkata. Students from all over the country are eyeing these cities for a bright future in the field of IT and related branches, and arriving in these cities for their jobs. So, Hyderabad, Pune and Kolkata have allowed thousands of jobs aspirants to find jobs, immediately after passing out from the colleges.

Presence of a large number of domestic and multinational companies in these cities has allowed people to get the jobs commensurate with their qualifications. Also, there are many varieties of jobs that people can choose from, work and learn in these freshers jobs and carry on their futures in these prospective opportunities. Product manager, AdWords associate, software engineering intern, technical lead, staffing manager, etc are jobs in Hyderabad for freshers that are found for the fresh college grads. With such prospects at hand, it is obvious that the students will yearn for the jobs in Kolkata for freshers.

The IT industry in Noida is also growing by leaps and bounds due to the setting near to the capital city of India. Many multinational companies have either established their offices in this city or are planning to set up more offices in Noida. This has brought up many more jobs in Noida for freshers, who are also applying for these jobs with increased enthusiasm.

In recent years, Kolkata is also being expanded to accommodate the demanding needs of various IT and related companies to open their offices in the city. As a result, the city has been planned into newer areas, where these companies are opening their branches and are recruiting fresh graduates so that the jobs in Kolkata for freshers are increasing by leaps and bounds.

This kind of scenario is found in many parts of India as software and IT companies are finding India as a growing economy with can provide a stable environment to conduct businesses in the information technology field. It is adding to the opportunities for freshers and giving them ample chances to work for the best companies in the world, even by staying back in India.
