Skills Needed to Become a Successful Electrician

by Louise Hutchinson

Article published on April 12th 2012 | Career

Electricians have the duty to install & maintain fuses, wiring and varied other electrical parts necessary to infuse electricity in homes, factories and other commercial spaces. In this age, when everything is so electrically defined, itâ€™s needless to mention that electricians would be in high demand everywhere. Thus people planning for the electriciansâ€™ career have excellent job prospects almost anywhere. But again, every aspiring electrician should acquire the necessary electricians career skills enjoy success in the respective field. The article below is going to highlight on the essential electricians career skills every electrician must hold.

Academic skills:

Though the electriciansâ€™ career is mostly technically inclined, yet he needs to have some necessary academic skills. First of all, you need to have a good hold over the English language as the electricianâ€™s training would need you to study a lot about different electrical theories, the techniques and methods of installing electrical appliances, steps to maintain the electrical fixtures, different safety practices, blueprints and electrical code regulations- all of which would be written in English only. Besides, a considerable Mathematical knowledge is needed to as the electricianâ€™s job would need him calculate the different measure while working with the installation and fixture of electrical appliances. Besides, itâ€™s good if you are flexible with drawing artworks as higher level jobs would need you to draw circuit diagrams too.

Technical skills:

Technical knowledge is one of the basics of electriciansâ€™ career skills. Apart from the theoretical knowledge of electrical installations, the electrician should acquire a practical training regarding the electrical installations. You have to learn how to drill the holes, attach conduits, set up the anchors, fix, connect & test the wiring, switches and outlets. Besides, in the higher levels, you would be trained on how to connect the wires to the circuit breakers, how to handle the transformers & the usage of varied equipments plus safety installation procedures.

Other skills:

An aspiring electrician should develop good level of dexterity, sound hand to eye co-ordination, physical fitness as well as a considerable balance sense. Itâ€™s because your job would require you to kneel, stand, stoop and bend for longer periods and travel to longer distances. Moreover, a good color sense is also necessary to distinguish the different colored wires. Last but not the least, itâ€™s good if you can acquire a Spanish training since Spanish is one of the most widely spoken languages around and would help you to communicate with varied forms of client from different places.
