Organic Clothing with Custom Screen Printing by James Blee

Article published on January 18th 2012 | Clothing

There is nothing unusual or awkward in wearing t-shirts with custom screen printing. On the contrary, organic clothing can offer a variety of benefits Organic clothing is environment friendly and has no ill effects on human skin. . At the same time, you are assured that you are not wearing anything that has even a tinge of chemical in it. The inks are compostable and the solvents used are safe and non-toxic. Putting on organic clothing is also a very good advertising to save environmental degradation.

Custom screen printing for organic clothing makes sure that toxic chemicals used in traditional screen printing methods are totally avoided. This includes the absence of PVC and heavy metals which could be very dangerous if present in your clothing. The material for organic clothes is obtained from sustainable and eco friendly farms making sure that you are not adversely affecting the planet in any way. Sustainable farms growing 100% organic cotton and other fabrics contribute a lot to the planetâ€™s well being and by supporting it; you would be doing a favor to the right cause.

Organic clothes are made with the help of processes that use safe and biodegradable materials. The fiber is grown without really using harmful chemicals or pesticides. Every step of the process from the farming to the packing and delivery of your clothes is eco friendly making sure that the environment has only gotten better for it. Organic clothes also help in retaining natural resources, recycling, and reusing them from time to time. The range of clothes is impressive too from t-shirts and sweat shirts to chic tote bags. It is a highly economical and extremely impressive solution for our clothing needs without hurting the planet in any way.
