The Next Big Trend for Online Shopping is Born by Kate Grumont

Article published on May 20th 2012 | Clothing

There is nothing more rewarding than a bit of retail therapy. However, heading out to the high street to try on maternity clothing, all the while glancing in a full- length mirror can be less than flattering. Thankfully, with most of the big maternity clothing brands selling online, shopping can now all be done form the comfort of your own home.

What youâ€™ll notice when you begin your search for maternity clothes online is that there are hundreds of stores dedicated to selling maternity goods and related accessories. In addition, stores such as Top Shop have recognizing the growing demand for on-trend maternity-wear and offer a great selection of clothing for expecting mums through their websites. What does this mean for you? Well, more choice at cheaper prices! With fierce competition, quality items are at your fingertips. Itâ€™s worthwhile spending a bit of time browsing different websites, comparing value, quality and styles to find your perfect fit.

A common question from women in regards to buying maternity clothing online is: How do I know what size to order when I will be continually growing?â€• This is a valid question and one that all reputable online stores will assist you with. The general rule of thumb is that retailers encourage women to order based on their pre-pregnancy size. Maternity clothes are designed based on your size before youâ€™re pregnant, and to then expand and fit you throughout your pregnancy. There is no need to guess what size youâ€™ll be in 3 or 4 months time as the designers have taken this into account for you. However, if you are lucky enough to be having twins, then we recommend that you do go a size larger as you are likely to grow that little bit more!

One final tip ladies â€“ youâ€™ll be surprised how many of you forget to do this! Always remember to have on the right maternity underwear when you try on your maternity clothes. It is amazing what difference a properly fitted maternity bra can make to the fit and feel of maternity clothes.

Shopping for maternity clothing online actually offers far more variety than if you were to head out to your local high street. Brands have caught on to the fact that some (ok, most!) women will feel more comfortable trying on maternity clothes in a more private environment, hence the ever-increasing competition in the online marketplace.
