1. Always check the fabrics used for cheap t shirts, the best and most recommended fabric would be cotton, say sources. There are many t shirts available and made of cotton, which is a natural fiber. And since the t shirt is made of natural fibers, your body gets to breathe, no matter how hot it could get outside, remain cool and very comfy wearing cool shirts made of cotton, not something that would be on you to itch and scratch.

2. Necklines don't look the same when you check carefully with cheap t shirts. Some of them come with boat necks, plunging necklines, scoops, v necks, and even the simple round neck types as well. For those who have shoulders that are broad, they shouldn't choose scoop necks or boat necks. Such designs are meant to give slim shouldered people a broader look.
