Let us know more about Certifications and Training for Medical Assistants by [Medical Assistant](#)

Article published on April 16th 2012 | [College](#)

In the words of Wikipedia, “Medical assistants are health care providers who perform administrative and clinical tasks to support the work of medical doctors and other health professionals. They perform routine tasks and procedures such as measuring patients' vital signs, administering medications and injections, recording information in medical records-keeping systems, preparing and handling medical instruments and supplies, and collecting and preparing specimens of bodily fluids and tissues for laboratory testing.”

One of the easiest ways of entering the healthcare industry includes through the profile of a medical assistant. Medical assistants are in great demand, a proper certification and training goes a long way in ensuring success for an individual.

In the section below, we have comprehensively focused on training and the different types of certifications programs for a medical assistant.

Training “ Every aspirant needs to bear this in mind that training plays an imperative role when it comes to finding suitable opportunities. Any training schedule whether short or comprehensive should have proper accreditation in order to avail suitable opportunities. On-job training offered by a training institution makes a medical assistant ready to take on the ropes of the responsibilities.

Types of certification “

The expanding healthcare industry means that lucrative health care opportunities will always be in vogue. There has been a lot of confusion among students on whether they should become certified medical assistant or registered medical assistant. Certifications are usually helpful as they help an individual in achieving a professional advantage. Candidates also have the varied choices of four organizations when it comes to being certified.

Certified medical assistant (CMA)- Those looking to become in to certified medical assistant (CMA) have to pass the test conducted by the American Association of Medical Assistants (AAMA). Only an accredited training program will make an individual eligible for this certification. This certification process also requires renewal and recertification after every 60 months of time.

Registered Medical Assistant (RMA) “ In order to become a registered medical assistant, an individual has to be registered with American Medical Technologist (AMT). Eligibility criteria include either having being trained in an accredited institute or having an experience of 5 years and more.

Along with AAMA and AMT there are two other certifying bodies that include National healthcare association and National Centre of Competency Training. The national health association offers two types of certifications. These include Certified Clinical Medical Assistant (CCMA) and Certified Medical Administrative Assistant (CMAA). The National centre of competency training has a rigorous procedure when it comes to certification. It is an independent organization providing certification and requires a minimum of 14 hours of continues education every year.
