Article published on May 29th 2012 | Communication

The Ai phone Group is considered one of the most reliable and respected communication systems in todayâ€™s world. The products manufactured by this multi national company, range from simplest of door answering units to highly technologically developed yet sophisticated security and communication systems. These highly credited product stand at the top and cannot be rivaled in design, simplicity, technical excellence and reliability. They are also the manufacturers of intercom solutions, provide audio and video systems and also specialize in access entry and control systems.

Founded in 1948 in Nagoya by Shusaku Ichikawa, the company aiphone has grown to become the world's largest manufacturer of intercom systems. The company has worked efficiently in increasing the popularity of intercoms and has made them to be indispensible in daily life today. The technology used by the company in security and communication has been constantly innovated since the past 60 years and is expanding today also.

This company has also focused on quality in every step it takes and is considered to be a leader in communication solution houses. Through our strong commitment to Total Quality Control, the highly qualified professionals work with utmost efficiency, commitment and work to improve the products and processes. It has also been awarded with various awards for its excellent performance and out standing innovation of technology. It became the first intercom company to be awarded with the highest international award for quality control was awarded to the brand, The Deming Prize. It also holds the achievement of being the first intercom company to be certified under ISO 9001.

Not only considered to be the top intercom company, Aiphone is also taking steps to create environmental awareness and also invests in developing technologies that will minimize the load on the environment. â€œCreating a new kind of securityâ€• is what Aiphone follows and preaches.
