Know More About Aiphone Intercom System by Angie Turner

Article published on June 8th 2012 | Communication

One of the most popular and trusted intercom manufactures in the world, the Aiphone intercom systems is a multinational company set up in 1948 and has been manufacturing high quality intercoms since the past 60 years now. The intercoms and communication systems supplied by them cover a very wide range which includes door answering units, video entry security systems, micro processor based commercial systems and also the residential security and communication systems. They are easy to understand, install and operate and have globally made a mark for their efficiency and quality.

The company was founded in Nagoya by Shusaku Ichikawa and since then the professionals of this company have been working continuously to improve the quality and bring In new and efficient technology through constant innovation. Considered to be the number player in the intercom business in the world economy, the main motto of this company has remained to be Total Quality Control. The intercoms manufactured and the huge variety available is known to take care of all the communication issues people face. They are tailor made according to different needs and environments

There are more than 30 intercom systems manufactured by Aiphone just for the commercial purposes and protect the staff and the people with the help of a system placed to check every visitor. Other environments that Aiphone caters to are Educational, Government, healthcare and Residential environments. AIphone has different series for each of the environments mentioned above. All the intercoms come with a three year warranty and despite the main offices being located in US, France and Japan, They deliver their products up to the continent of Australia.

Aiphone has also been awarded with several accolades for its efficiency and innovation. It was the first intercom company to be awarded the Deming Prize and was also certified under ISO 9001. They are also proving to be a responsible company by taking genuine efforts to reduce the load on the environment that comes through manufacturing.
