Money Saving Tips for Students: Lower your Phone Bill Using the Internet Phone Service by John Peterson

Article published on June 4th 2012 | Communication

Each,, who was a college student or have a child in college to understand, as much of a challenge it can save money while working his way through school. Even a scholarship, you still have, money, food, gas, fun and living expenses, including your phone bill aside. That is why many students are choosing to use Internet-based phone services to help them keep in touch with friends and family back home. These cost-effective solutions allow students free (or at least inexpensive) calls that can make a big monthly expense of long-distance thing of the past. There are several options to choose from depending on your needs.

One option you have is to make Internet phone service that works with your computer. If you use your computer, only additional equipment you need is a headset or microphone / speaker combination. Then all you do is inspired by your favorite Internet phone software, and you can speak and hear the person on the other side. Most software allows you to call landline phone numbers, although some may charge a fee for this. You can also make calls to other computers, and usually this is a service that is provided free of charge. This can be a great option for people who have computers and related hardware at both ends of the link. You get all the crystal clear calls without having to pay expensive long distance bills. And even if your service charge for calls to landline phone charges are usually much cheaper than what you would pay using your local phone company.

Another option is to use Internet phone service that works with the actual stand alone phone ... or your regular phone or a special phone to work with such systems. Your local telephone company can now offer this service, making it easy to switch. In addition, there are several companies that specialize in providing only an Internet phone service that you can easily switch, as well as to keep their existing phone number. Typical of these types of prices, anywhere from $ 15 to $ 30 per month, depending on the chosen plan.

Of course, the price is so low, it may be that quality is suffering, or be much worse than a traditional phone. However, it is far from the case. Actually, you probably will not be able to tell the difference between a regular phone calls compared with the calling line, especially if you are using a broadband Internet connection, which most companies recommend (if necessary).

In general, the use of the Internet, how to call and keep in touch with the family home can be a great opportunity to cost-conscious student. Gone are the days when you have to hunt around for the best calling card, or stuck with a high per-minute charges away from their local phone company.

If you are interested in learning more about your Internet telephony capabilities, a quick Internet search will direct you to the many companies offering this new and exciting services.
