Nokia 808 PureView: a Fascinating Phone from Nokia by Sushant-tech

Article published on May 1st 2012 | Communication

Keeping up to the expectation level of the consumers, Nokia had announced another smart phone named 808 PureView. The official announcement was made by Nokia during the Mobile World Congress 2012. Being a very versatile handset, these are expected to serve a large number of buyers in every nook and corner of the globe. These latest Nokia Mobile phones are manufactured incorporating advanced technology and aims at capturing the attention of the consumers to a great extent.

The buzz is that 808 Pure View is the best smart phone from Nokia till date. The main USP of these handsets is the powerful 41MP shutter featuring Carl Zeiss optics and Xenon Flash. This phoneâ€™s camera has an excellent resolution of 7152 x 5368 pixels. Equipped with such a potential camera, these Nokia devices are sure to give a tough competition in the market. Besides, 808 Pure View handsets feature a 1/1.2" sensor size with ND filter and are capable of utilizing up to 4x lossless digital zoom. The camera of these handsets is also featured with aperture ratio that many digital cameras do not possess. The user also gets a chance to record videos at 1080p and at 30 frames per second. Moreover, these phones are also equipped with an LED light as well as maximum digital zoom for enhancing video recording capabilities. There is also a VGA front-facing camera, which is featured with a 30 frames per second video recording capacity.

Nokia 808 Pure View is powered by Nokia Belle OS. This new OS will enable the user to enjoy more home screens as compared to older versions of Nokia devices. Apart from this, with this new OS you are able to view your e-mails easily. In addition, the handset is attributed with a 4.0" AMOLED capacitive touch screen having a resolution of 360 x 640 pixels and at 184 ppi for its pixel density. Nokia has ensured the protection of these screens with the tough Corning Gorilla Glass. Furthermore, the user can enjoy these handsets with Nokia Clear-Black display. You can enjoy more vibrant colors and deeper black on these phones. As far as sound is concerned, these phones will enable you to have Dolby Digital sound experience, as these are featured with Dolby Digital Plus and Dolby headphone enhancement jack.

You can just relax regarding the size of the phone. The accurate dimension of this device is 123.9 x 60.2 x 13.9 mm and it has a weight of just 169 grams. These handsets are known to be very compact and sturdy despite of its powerful camera. You can fit this handset into your pocket very conveniently and can carry it to any place without any discomfort. If you evaluate the features and specifications through Nokia Mobile Phone Review, you will definitely fall in love with this handset. Yet to be released in India, these phones are provided with all the potentialities to cater to a large section of mobile phone users.
