Tablet PC: a new name in the Technology by Sushant-tech

Article published on July 17th 2012 | Communication

Since long technology has always amazed the humans. Whether it was the creation of computer or development of mobile phones, technology plays an important role in our lives. One of best examples of innovative creation is computer. This fully loaded electrical device has undergone through several transformation since it was made. It was a time when we used to have that large PC with bulky monitor. As the time changed, laptops were introduced in late 90â€™s to the consumers. This lightweight and compact sized laptop became the favorite gadget of the tech-freak consumers. With the introduction of modern inventions and latest technologies, these laptops started getting more sleek and small. The era of Notebook started, which made people carry their devices without any worry. Still the desire of human never came to an end; they wanted something more compact included with touchscreen like latest smartphones. So, it was the time when Tablet PC was discovered by Apple. The company launched their first ever tablet, which was called iPad. This tablet made a way for several other brands to come forward and develop their own tablet PCs. Then 2010 saw the launch of hundreds of tablets from local as well as global manufacturers.

The exponential growth in the demand of most advanced and latest digital slates made companies to develop and launch series of tablets one after other. Tablets have gained much popularity than expected in India. Manufacturers are doing their best to woo the consumers with latest schemes and offers to purchase these small and sleek computing devices. Global brands like Samsung, BlackBerry, Sony, HCL, HP, Apple, Toshiba and ViewSonic have come up with tablets that are rich in feature and known for their high performance. Also, there are local brands like Karbonn, Micromax, iBall, WishTel and other companies that have made full-features cheap tablets keeping in mind the mass population of mid-income consumers in India.

So, when it comes to decide which tab to purchase, the first name that comes into the mind is Samsung Galaxy Tab. The latest from Samsung is its Galaxy 2 10.1, which runs on Googleâ€™s software, Android v4.0.3 and is powered with TI OMAP 4430 Dual-core 1 GHz Cortex-A9 processor. Further, this android based tablet is provided with good networking options like Bluetooth v2.1 + EDR, GPS facility and features included pre-loaded accelerometer sensor, gyroscope and compass. This light and portable Tab is a marvel of engineering and touted as the most awaited & advanced tablet ever made. Also, this slate is integrated with a 3.15MP camera and sports 10.1 inches PLS TFT capacitive touchscreen, which is protected by Corning Gorilla Glass. But will this tablet from Samsung will survive for long as more and more brands are coming up with latest & advanced tabs each day.

Consumers today have a wide option to select the tablets that are available in cheap as well as in high prices. Also, there are various online retailers, who are offering Latest Tablet PC at throw away prices bundled with some offers or gift hampers.
