Create a Passwod Reset Disk for Windows 8 by Brionduffy

Article published on July 11th 2012 | Computer

Windows 8 is an initial name of Microsoft's new operating system. Considering the words in the new logo, we can assume that "Windows 8" is going to be the actual name of the new operating system even if it hasn't been confirmed. With Microsoft's release of the developer preview to the general public, users are probably wandering what the specifications for Windows 8 are. You will be happy to know that Windows Developer Preview works great on the same hardware that powers Windows 7 and Windows Vista, which means that the final release of Windows 8 will most likely work well on computers that purchased three to four years ago.

As we know, Windows 8 is the newest operation system version of Microsoft Company. Some point of windows problem happen, we need adopt the distinct ways to other versions. And forgot windows password is the common troubles happen on windows 8 users. When it appear, what measures can we do? Here is a good Windows 8 password reset tip for you to in case of lost the password.

Create a passwod reset disk for Windows 8

A password reset disk could really come in handy if you ever forget Windows 8 password. The problem with this method is that you have to create the password reset disk before the password is lost. Assuming that you have created it in advance, then you can use this method to reset Windows 8 password easily.

1.Once you've typed the wrong password, Windows 8 will show a Reset password link below the login box.

2. Click on Reset password. Make sure that password reset disk is plugged into the computer at this point.

3. When the Password Reset Wizard appears, click Next to continue.

4. Select the right password reset disk. Click Next.

5. Type in a new password and a hint for the password. Click Next.

6. Click Finish. Now you can log in to your PC with the new password.

What to do if i forgot to create a password reset disk

Don't worry if you lost Windows 8 password and can not able to login to windows 8 then you can try the Windows Password Unlocker - which can resets any Windows password. It can reset domain passwords too. It removes all logon restrictions, so that you can logon to your computer. Windows accounts can be locked, disabled, or may have reached a failed logon attempt threshold. Reset Windows Password removes all Windows logon restrictions that prevent you from logging on to your computer.
