Dell 1250c Color LED Laser-Class Printer by Harish Sheel

Article published on April 23rd 2012 | Computer

Dell 1250c Color LED Laser-Class Printer offers a higher resolution output prints on both balck and white as well as in color. Setting up the Dell 1250 is simple. The Dell 1250c Color LED Laser-Class lacks wireless technology for connectivity, just like Dell 1130n. This printer uses USB port for connecting with other devices, so at a time only one user can access this printer via computer or any other devices. The Dell 1250c Color LED Laser-Class Printer has compact design, which makes it possible to place this printer anywhere in the office. However, the absence of Ethernet and Wireless connectivity could dissapoints the users by limiting its reach in the networked office.

This printer is best for single user, who might be looking for a single function laser printer, which has the ability to produce both colored and black and white output prints. Currently, Dell 1259c is available for $150, which puts this printer in the same category as that of multi-function inkjet printers that has the ability to send fax, scan and copy the dicuments. However, if you didnâ€™t want to wait long for the ink to get dry, going for the Dell 1250 c laser printer could be better option.

The Dell 1250c printer has dark black colored body, which gives a professional look to it. It has the dmensions of 15.5 x 11.8 x 8.9 inch body, which makes it a compact printer that can be placed anywhere. The printer has folddown paper sheet output tray, with a control panel which is located at the top.if the printer is placed high you may have to physically get near to the printer to see the printerâ€™s LED indicators.

Dell 1250c Color LED Laser-Class Printer has few buttons for contolling the printer. It has one button for feeding the paper and another one is for cancelling the print command. It has additional four LED indication lights, which indicate the amount of toner left in the cartridges. Overall we can say that, the printer is decent and simple to operate, but the absence of Wireless connectivity technology would dissapoints the users.

Dell 1250c Color LED Laser-Class has two separate paper bays, which are used for holding 150 sheets of white paper and for corraling the outgoing paper sheets. Another impotnat feature included in its tray is, slides on either side, which give users the ability to adjust the tray for standard legal paper, envelopes, labels or any other papers.
