Article published on May 23rd 2012 | Computer

Remember, back in 70â€™ when people used to jot down everything using a ball pen and in fact accountants at that time utilized their hands to calculate the financial expenses. Did you ever though that a time will come when our each official work, messaging, gaming and social life will be transformed into virtual world. Our entire life will be dependent on a machine, a brilliant and intelligent machine. All of a sudden, with the emergence of advanced technologies came Latest Desktop Computers that made our tasks simple and enabled us to execute the same with great ease. With these computers, we were able perform our each work systematically with high efficiency and quickly. But at one time, people with high income were only the consumers who used to own these computers. With the changing time and as the earning power of the consumers improved, people from all income groups were able to afford computers. In last few years, the prices of these computing devices have lower down tremendously. Ask any gizmo freaks, they will provide you with one single answer, introduction of laptops diminished the value & price of desktop computers. Yes, with more and more advanced laptops coming in, the market share of personal computers is losing its cynosure. The looks, brilliance, performance, size and capacity, all the aspects of laptop were enough to make consumers forget those old and outdated devices. One question that arises in our mind is, has the era of desktop computers have ended?

But after going through numerous market research and surveys, it has been found that desktop computers are still in demand among various people. At present, there are number of companies that are continuously working towards the promotion of these electronic gadgets. Targeting each class of consumers, these companies have decided to revamp those outdated machines so that people have the option to select from both laptops and desktop computers. With the availability of latest technologies, the IT & electronics companies were able to come up with more advanced and upgraded versions of desktop computers. Apple, HP, Lenovo, Dell, HCL, Acer, Sony, Asus and Zenith are some of the renowned brands that offer us with the most advanced PCâ€™s in the world. The modern inventions have proved to be a boon for desktop computers. Gone are the days, when we used to own large and heavy desktops, today the same bulky machine have transformed into all-in-one desktop computers. The conventional computing device has been changed into compact machine, which now has a stylish TFT screen in place of those big monitors. These next generation computers are more advanced, capable, powerful and known for their outstanding results.

According to the Latest Desktop Computer News, HPâ€™s latest All-In-One DreamScreen 400 Touchscreen Desktop is the talk of the town. This all new instrument is considered as one of the most advanced and next generation computing device ever developed. Have we ever thought of working on our PCâ€™s with just a single touch of fingers? No. But HP Pavilionâ€™s All-In-One DreamScreen 400 has he functions that let you discover the virtual world with the use of your fingers, not on the keyboard but on the screen, which is touch sensitive. With the latest inventions taking place, things are rapidly changing and along with this we are witnessing new & latest technologies every day. So, next if you think that desktop computers are outdated, just have a hand on experience on the latest PCâ€™s available in the market.
