Diablo 3 Drospects Might Be Worried by Moubinwoo

Article published on July 19th 2012 | Computer

A month and a half, the hottest game is definitely Diablo 3, the first week of 6.3 million sold makes many market analysts unbelieve, and it also became a PC in the history of best-selling video games. However, Diablo 3 after the launch has encountered many problems in just a month and a half the number of both online and players reputation suffered a severe setback. Diablo 3 will be so short-lived? Who will become a murderer kill Diablo 3?

Cause of death of a: BUG

Diablo 3 from the moment the official release of BUG feedback and correction go hand in hand. In order to guarantee the mystery of the stand-alone story, the Blizzard in the long test period, provide only a short period part of the first section of the Skeleton King, behind the game content has not been any public test put on the container of the game chain. This behavior has also led after the emergence of numerous or large or small BUG, ??so that the player's gaming experience to be seriously affected, and the Blizzard in order to fix these BUG boggling.

Cause of death: cracked version

June 20, the famous third-party games and groups Skidrow release cracked version download of Diablo 3 with LAN mode, although this cracked version is still very primitive, and only include some of the basic functions, the monster AI and skill system is all specious, and also very frequent crash the client a variety of serious error, but after all, has taken a new step toward the crack.

Once the game is broken completely, the addition of stand-alone and LAN mode, Diablo 3 war net attractiveness is bound to a substantial decline, some players prefer no delay, free to modify the equipment, do not need to pay too much time to be able to enjoy more pure stand-alone mode, multi-game fun, battle net number of players to further flee will become a foregone conclusion, this will be connected with the blow to the popularity of Diablo 3 and accelerate the footsteps of his death.

Cause of death: auction

The auction is one of the flagship product of Blizzard Diablo 3, but also become a Diablo 3 Achilles heel, due to the region use the same auction, the mass of equipment information, and refresh rate the auction system often collapse, and seriously affect the use of the players.

The auction, on the other hand, are crazy to erode the fun of the game in the low-end grade equipment through the auction house armed with a very low price a number of trumpet and new, greatly reduces the surprises in the process of MF and harvesting sense. MF more boring repetitive work, and look forward to the emergence of very rare and the best equipment in the process of boring, a lot of players start losing.

If Blizzard does not quickly and effectively fix various problems with BUG about Diablo 3 and improve the quality of Blizzard's online, then Diablo 3 will continued to fall in the player's reputation. Now, Diablo 3 which seems like a semi-finished products on the quality of the game is far from the World of Warcraft. Coupled with the business means that a strong cash auction, we have serious concerns about the prospect of this dark new series.
