Article published on June 23rd 2012 | Computer

Are you searching for a suitable server storage option for small or mid-sized businesses? Drobo b1200i is here to provide with the most definite solution. Based on award winning BeyondRAIDâ„¢ technology, Drobo b1200i has been enriched with some additional features that help in providing automated data-aware Tiering, thus producing a level of higher automation as well as technical sophistication. And with easy application interface, drobo s is the product to look for.

Drobo B1200i has gone through much optimization to provide the most reliable server storage option offering highest amount of network data protection optimized for small and medium business IT support. Seamless integration through any TCP/IP network infrastructure can be done quite effectively through this Drobo. It also utilizes iSCSI protocol, which is regarded industry-standard, for providing simple yet powerful and consolidates storage option for business IT environment.

drobo b1200i is probably the first of its kind to use modular serviceable components. Hardware design offers a controller car that is removable, hot swappable dual redundant cooling unit plus power supplies. FRUs (Field Replacement Units) can be sourced in advance in case there is failure of some single hardware component. As a result, highest availability level can be achieved within virtual IT environments.

The iSCSI array of B1200i has the capability to hold a minimal of 36 terabyte of raw storage data. For additional storage capacity, the smallest drive can be replaced with a much larger one or simply install a new hard disk. This can be done even if the entire set of drive bays are totally packed up. The award winning BeyondRAID technology helps in leveraging the capacities of different drives, thus allowing for a constant automatic space expansion for larger drives. Expansion is instantaneous and automatic while maintaining total data accessibility level. This helps in protecting from a couple of drive failures simultaneously.
