Article published on December 29th 2011 | Computer

Your love for Lenovo is not without a cause. Its innovative approach towards technology, flamboyancy matching the lifestyles, and loyalty penetrating the deepest of the satisfaction-core has made it a global brand. Diverse range of laptop models available under IdeaPad, ThinkPad and Essential series are sure to balance life with their Intel multi-core technology, improved battery life, enhanced wireless capabilities, 3D technology, Dolby and SRS sound and high-definition graphics. Stylish design with bold colors or a sleek metallic finish is to raise your glam quotient while Turbo Boost and RapidDrive technologies are to accentuate your performance.

However, you canâ€™t expect every day to be yours. And, there might be hurdles or issues with the Lenovo laptop. Most of the problems are encountered due to software incompatibility or conflict. But say thanks to Lenovo Customer Support as it never sleeps and is always happy to provide quick solutions to fix different Lenovo laptopâ€™s issues. In this article letâ€™s cover a few frequent issues alon with their solutions.

BIOS-related Issues :

What to do after the BIOS password is lost ?

1. Go to "Advanced BIOS Features", set "Security Option" as "System" (or "Bios feature setup"â€""Password setting" as "System").

2. Go back to BIOS main window, select "Set Supervisor Password" to specify a password.

3. You are advised to clear a BIOS password. Within BIOS main window, select "Set Supervisor Password", when "Enter Password" appears, hit RETURN to remove the password.

4. If you have forgotten your password, it is advised to send the PC to a service center to clear CMOS. (The specific cost is based on service policies.)

Lenovo Startup Problem :

If the error message displayed on the screen name any particular program or files then go into the System Configuration Utility and disable those. Click the â€œGeneralâ€• tab, and then click â€œSelective Startupâ€•. From here disable all objectionable programs. When you are prompted, click Restart to restart the computer. Use the Windows Recovery Options in Windows 7 and follow the startup repair tool.

Shutdown Issues :

Standby button in the shutdown menu is no available.

This hints about the presence of any incompatible software on the Lenovo laptop. If so, try after uninstalling that particular software. You may also try by reinstalling the graphics driver. Sometimes the problem could be averted by re-installing a genuine copy of Windows.

While shutting down, system prompts a message that an application program is no response or

needs to quit :

1. Click "Quit the program". Or you may need force shutdown â€“ press and hold the switch button.

2. If the message often appears, please uninstall the software or update the software.

After issuing a command to shut down the computer, nothing happened :

1. Force shutdown.

2. Check whether the symptom appears after you installed some software or hardware. If so, please uninstall the software or update the driver for the hardware.

Windows Login Issues :

If you have forgot or lost the Windows Logon password then restart the computer and enter safe mode, try to use blank administrator password to log in and create a new administrator account. In case the login fails, you have to reinstall the system software. Donâ€™t forget to back up your data in advance.

However, if above solutions are not lending you anywhere then contact on the Lenovo number and let technicians to do it for you. While selecting the option for online Lenovo repair, credential and reliability of the service provider must be taken into account.
