Article published on June 27th 2012 | Computer

10 years of waiting, Blizzard Diablo series classic game is finally back once again as a new work of the sword of the decade Blizzard, Diablo 3 exactly how the quality, if the satisfaction of the fans of Diablo big ticket, whether Blizzard should return, Diablo 3 to what extent? Perhaps we should now explore this issue and some premature, but Diablo 3 crossed the pre-market test has been widely demonstrated the quality of his game, and market feedback, Blizzard and its maintenance of sincerity, with us enough to Diablo 3 of the future performance of forward-looking statements.

Diablo 3 quality

While this work belongs to Blizzard development team dark had a huge shock, but the final outcome of view, Diablo 3 still shows the ability Blizzard game development industry leader, it's even a play Blizzard brand on the strength of the brilliant masterpiece. Design work, skills, systems, manufacturing systems, design and stage, and so on Diablo 3 inherited Blizzard has always been the spirit of excellence, compared to previous work of the Diablo series, Diablo 3 may remove some classic elements, so that some players disappointed, but it is still a master system, compared to the seminal work of other vendors, Diablo 3 in terms of quality still head.

Of course, the Diablo 3 there are still some regrets focus on the numbers game such as skills and equipment of the system is a little boring, too few interesting details, visual style is not enough not dark, and networking in the form to make The game environment is unstable. Compared to the previous two generations of classical works, precisely because of the comparison, we can prick Diablo 3 Where is not good enough, what design abandoned the spirit of Diablo games. This innovation is a pair of earlier work of subversion, but from the game's content, depth, width, and playable , difficult, monitoring could be improved and more, Diablo 3 the vitality of the game, at least not less than its predecessor, of course, it depends on the future maintenance of Blizzard's efforts and update.

Diablo 3 real money auction house (RMAH)

If the Diablo 3 the biggest difference game modes in the previous works, it should be implanted in RMAH. It seems from this form, probably reflects the bare essence of the Blizzard of hijacking of the game from Blizzard in order to maximize the make money? The introduction of RMAH will cash seriously affect both the balance of the game environment, but the nature of fast food from the time the auction of the most widely accepted cash could only be Diablo 3 faster food, leisure , you can not make the coolies in the game, as long as you have the money ready to invest the RMAH. RMAH is a double edged sword, being part of players traditional disappointed, but at the same time to attract another group of players fully recognized in the game using the money to build strength.

Of course, Diablo 3 RMAH is based entirely on the quality of the game itself is based on the quality of play can not follow the RMAH will only lead to worse results, On the contrary, if the quality of play and appeal no problem, then the auction will be species in the game hot trade, disguised to improve the popularity of the game from this point of view, Blizzard Diablo 3 with great confidence.

A combination of focus, I think Diablo 3 have a strong market more optimistic, it will be the same as the works of the previous generation players taking the same persistent support. But I also think the Star Wars OG, and the failure of some masterpiece on the other hand, most of the monitoring and maintenance updates for Diablo 3 is just as important hopefully, to Diablo 3 can continue to shoot, and cash game betting transactions may continue to be hot.
