Article published on August 13th 2012 | Computer

Containing almost all of the much wanted features missing from the development language so far, HTML5 has come up as a favourite among the developers and still growing and getting better every day. HTML5 is all set to offer more facilities and options to the developers. HTML5 when coupled with JavaScript and CSS3 is turning out to be a favourite among the developers. For most of the people Mobile Web is an indispensible part today. The world of mobile now can face the challenge of meeting the demand of people, be it for talking on the phone, texting the friends, sending business e-mails, using social media or playing games when you are on the go. For gaming the first priority is getting seamless connectivity on a constant basis. It is becoming important to have a smartphone which is HTML5 friendly.

HTML5 games are getting massive popularity and it is because of its dynamic nature that the attitude of people has changed toward gaming. But since most of these channels are on PC, there are very few mobile Channels for HTML5 games. Therefore, although tempting cross-platform games like Fruity Annie are emerging, there are not many mobile Channels for such HTML5 games. The HTML5 games developers are creating highly exciting and enticing games but the reality is, they are still longing for a great mobile HTML5 channel.

HTML5 Mobile Apps are taking advantage of integrated development features of the platform to have better performance and maximum number of options to ensure rich interactivity and media. Taking advantage of hardware of the device, Html5 Mobile Apps can run in mobile browsers and on various mobile platforms and come with lot of advantages over the web apps.

With HTML5 the developers are being able to create amazing games. For example, NTFusion has developed a fantastic range of puzzle games and Fruity Annie is the latest buzz in the field. This cross-platform game can be played for absolutely free and this online Physics game runs on Android devices quite smoothly. When good quality mobile HTML5 games like Fruity Annie has already come in the world of online gaming, it is the lack of mobile Channels for these HTML5 games and what is needed more and more of such channels so that the developers can be inspired to make more such games like Fruity Annie.

Fruity Annie is quite an addictive puzzle game. This cross-platform physics game which is quite fun to play, comes with exciting 25 challenging levels. NTFusion which has developed some of the best HTML5 games can boast of the best collection of free puzzle games, action games, strategy games, adventure games, multiplayer games and many casual games. The latest favourite Fruity Annie is available on Chrome Web Store and come with 7 different free to use tools. The free mini games by NTFusion have received great popularity among the online gamers. Today the whole world is getting mobile and the gamers do not like to get stuck to their PCs to enjoy a game. Rather they prefer to get these games on their mobile devices. Itâ€™s time to enjoy the HTML5 games on mobile Channels and as soon as more and more mobile Channels will be available for these games, the developers will get inspired to create more and more HTML5 games like Fruity Annie.
