Lenovo New Product Lines and Challenges for Lenovo Support by Dawa

Article published on January 16th 2012 | Computer

International Consumer Electronics Show 2012 witnessed hi-tech products from Lenovo end. Products imbibed with the groundbreaking hybrid functionality, distinctive design and innovative engineering have been acclaimed by renowned independent review portals such as PCMag.com, Popular Mechanics, LAPTOP and Tomâ€™s Guide. The Lenovo IdeaPad Yoga blending ultrabook and tablet features stood on the top with 9 awards, Lenovo IdeaCentre A720 All-In-One won PCWorldâ€™s Best Desktop award for its advanced ergonomics and elegant design. Tablet and ultrabook series is powered with the Android 4.0 or lower edition of Ice Cream Sandwich with unmatched 20 hours battery backup.

The brand allegedly places performance, entertainment, connectivity and portability at one platform. The Do business machine ThinkPad product line comes with state-of-the-art features to accentuate the computing experience. Have a good hold on your tablet with the new Digitilizer pen; swipe, drag, open, click, mark up images or sketch drawing, and do more. Avail full device and SD card encryption and the protection of McAfee Mobile Security app to check viruses and spyware.

Pre-installed Computerance Mobile app further raises the security index, which can track your lost device or block fraudsters from getting access to sensitive data. Range of preloaded apps regarding security and management, task doer (Documents to Go, PrinterShare, etc), communication (SocialTouch, eBuddy Messenger, ooVoo,etc.), entertainment (mSpot Movies, Netflix, etc.), are a few to name.

Most of the showcased products are expected to hit the market in few months, and right now no significant Lenovo Reviews is available. No doubt Lenovo is a renowned name in the market but considerable risks and challenges are always associated with new range of products, so being apprehensive is the best approach. New array of products also bring additional responsibilities for Lenovo Technical Support, and its technicians.

The latter needs to set up the platform to provide personalized support for coming products as these are equipped with unique software apps besides shifting the operating system base from Windows to the Android. Leaving the critical software section, problems related to the Internet setup and connectivity, e-mail setup and configuration, peripheral configuration, computer security, data backup and recovery are quite common, that are inherited more or less in the same manner. Decentralization of tech support from the brand to the third-party vendors is a big advantage, and you can expect prompt and effective service at the comfort of the couch.

Whether you are a home or business consumer, lenovo help covers you all. Most of the portals work 24 hours a day and 7 days a week in an incessant manner without leaving you alone on any weekday and holiday, so nothing to worry. Remote-based support is another reason to stay cool, as the service is available through the Internet, so no matter where you are, enjoy the comprehensive and round-the-clock protection. Experts will help you with respect to the running operating system, application software and security software. Lenovo support set up, configure and troubleshoot Internet connection, peripheral, router and more, so that you make full of the technology and achieve more.
