Lenovo s10 - a good investment for small business by Paul Smith

Article published on April 20th 2012 | Computer

The Lenovo laptops come in a series called Lenovo s10-1, s10-2 and s10-3 is the latest one. This attractive electronic device will certainly add up to the beauty of oneâ€™s work place and will interact with the user as one of his/her friendly colleague. One can now be online 24*7 with Lenovo s10 and be connected always with the beautiful world. Will it not be a great idea to delegate the tedious and boring tasks such as remembering and recalling important office related information or the one linked to oneâ€™s loved ones such as the birth dates, contact numbers and house addresses? It adds enormously to the userâ€™s memory and lends him/her an additional space for storing the extra information which is otherwise quite difficult to obtain in such a handy fashion.

Large Memory Space with High Speed

The Intel processor makes the processing of its 1 GB memorized data faster at a speed of nearly 1.7 GHz. Its high strength battery back up of Li-Ion batteries and trust worthy memory of 160 GB in hard drive places the user in a commanding position all the time. This ATOM processor solely contributes in ensuring the fast speed that is an essentiality in business world to execute the commands quickly one after the other.

Other Attractions

The poses clicked when viewed on its solid and 10.1 inches large size TFT display screen gives the user the feel of a celebrity! The web camera fully satisfies the user with its colorful images that have an appreciably high resolution. The trouble making pointing device called mouse in the era of cumbersome personal computers is now replaced with a smooth touchpad in Lenovo s10 to increase the comfort level of the user while using it. Its light weighted body with not more than 3 Kilograms turns the heads towards it with a glossy ruby red body color. The keys are very strong and do not ever irritate the user in taking the commands from him/her.

Lenovo Laptops Price List

The Lenovo Laptops Price List starts from a justifiable amount of Rs. 17, 700. Such a low cost is a great attraction amongst the small business persons as they can make use of all the newest advancements in the rapidly changing field of information technology in addition to increasing their profit turn over. The price is little higher if one opts for various other easily available models of Lenovo laptops such as the Y-series models.
