Article published on July 25th 2012 | Computer

In any setting it is very important to take control of your stock whether it is in a retail environment or a library there are now many options available in order to keep on top of your inventory. At 247lib.com we provide a complete Library Management system for libraries of all sizes providing great quality library software which is effective, easy to use and flexible to satisfy all your individual requirements.

247lib.com are an innovative forward thinking company based in Basingstoke we have developed a superior range of library software to seamlessly take care of all your requirements. We have a wealth of experience in this very niche field and with our absolute commitment to customer satisfaction and on going support and back up we have gained a well deserved reputation as amongst

the very best Library software providers in the country.

The library management system is web based and is suitable for a wide range of libraries from schools and universities to government, law and health. The software is flexible in that it can be tailored specifically to your individual needs for example to catalogue art and then can also be used as a promotional tool via the web or more locally via intranet. Our main objective when the library software was developed was reliability, effectiveness and ease of use and we believe our library management system has achieved all of these goals. We have installed a power search option so that the user can find their book easily even with only part of the title or author. There is also a web based supervisor which means that help is always available making this library software an ideal choice for schools in that pupils can get involved in the working of the library.

Contact us online at www.247lib.com for further information or to request a free no obligation demonstration.
