This Diablo 3 Demon Hunter Guide is about two things: first itâ€™s meant to showcase how unprecedented this ranged class is, and secondly, to serve as an overview of their relentless play style, tormented history, and unmatched agile abilities.

Demonic History: These characters are enshrouded in burning hatred and seething vengeance. Typically, only those who died horrible deaths to the minions of the Burning Hells, and lost it all in the Dreadlands turn into Demon Hunters. They turned their endless Hatred into their endless resource of power to seek and slay the minions. An essence still remains within these dark persons that allow them to keep their own demonic soul at bay. To instead use and channel it in battle to the detriment of all who cross their path.

Demon Hunter Play Style: As with most ranged classes the Diablo 3 Demon Hunter relies on and utilizes distance with a vast arsenal of weaponry and tactics. This mystical ability allows them to jump into the shadows to either evade or ambush their foes. Because of their proficiency in hand crossbows, which they can duel wield, their damage output is incredible. This means that players can farm efficiently and level quickly. Finally, the hunter is the only class that depends on two resources, Hatred and Discipline. Hatred is for attacks and regenerates quickly, while Discipline is used defensively and must be employed wisely because it doesnâ€™t recharge as fast.
