Article published on March 1st 2012 | Computer

Windows Password Breaker is a popular password recovery software works on Windows 7/Vista/XP/2000, this program is available in 3 versions: Standard, Professional and Enterprise. The same as other most Windows password recovery software on market is available in many versions with a little difference. Though there is a comparison table on its official website, users who never notice the difference between each version may buy a wrong version. Please read the product introduction carefully and get a right version if there are several editions of your target Windows password reset software. Or you may purchase the Standard version which only allows you to remove Windows 7 password with a CD/DVD while you intend to use a USB flash drive as your PC doesn't support CD.

Even you forgot Windows 7 administrator password without a password reset disk, you should feel lucky that Windows password recovery software can still work for Windows 7. As a matter of fact, because of its 100% recovery rate, easy & safe operation and instant password recovery ability, most Windows 7 users troubled by lost logon password resort to this kind of software like reliable Windows Password Breaker to solve their problems.

If you belong to those who have little computer knowledge, you may get stuck to use that password recovery tool. So you may be surprised at why the computer asks you for administrator password when you want to download your purchased Windows password recovery tool and don't know what to do next. But to those who are familiar with computer, they definitely know that there are 3 types of user accounts on Windows 7, including administrator, standard and guest and only administrator users have rights to download, install or uninstall a program, etc. Once you encounter this problem, just download and run the tool in a computer that you can run as administrator, then complete Windows 7 password recovery.

The below is to list the steps for you to reset your lost administrator password on Windows 7 with Windows password recovery software. Windows Password Breaker is a good choice for this situation. It only takes you 4 steps to reset Windows 7 password within a few minutes:

Step 1. Download and install Windows Password Breaker

Step 2. Burn a bootable Windows password reset CD/DVD/USB flash drive

Step 3. Insert the CD/DVD/USB flash drive in the locked computer and set BIOS of the computer to boot from CD/DVD/USB flash drive

Step 4: Reset your forgotten password under DOS by following the instructions.
