Task that much people have met never these difficulties: got a DTS DVD play on a DTS DVD player, but no sound come out. Indeed. Effectively, reader DVD says that DTS (with the DTS brand can play on the front part), because not is sound?

When a reader DVD says can play DTS (has "DTS - label of Digitahi outside"), it means that it can read it from the DVD disc and effluisce through yours "digital out" port (on the posterior part of reader DVD) to receiving of avoirdupois. Thus you have need of receiving of avoirdupois (that it is inserted to the DVD via a cable types them coaxial optician or) to eliminate the flow of DTS, the decoded ones you produce and it to your loudspeaker 5.1. That is it has only a reader DVD with escape types them of DTS is insignificant, you moreover has need of receiving of avoirdupois that he is able of DTS. In a summary, you must spend several to the hundreds of dollars in order to obtain receiving of avoirdupois.

Like mention to DTS reader DVD, I must say something approximately codec dell' DTS audio. Or the music that the DVDs film allows to the audio delivery DTS tracks, but DTS has not been existed in the specific one originates them of DVD (1997), players of DVD in advance payment has thus not recognized the audio DTS tracks at all. The DVD specification was modified to allow optional inclusion of DTS audio tracks.. The DVD title it must transport or a more audio primary tracks in the disposition of LPCM or AC-3 (in Europe, MPEG-1 layer 2 is moreover a disposition of allowed primary track). Audio track of DTS can be selected by the user . Many players of modern DVD can decode born them DTS without problem. But some have need of an external decoder. That is the reason for which a DTS reader DVD says that DTS can not play, but healthy exited. In order to obtain with of the domestic theatre, you will spend many money.

In opposition, to obtain a software of DTS reader DVD only it will cost several dollars. Because test you do not obtain a software of DTS reader DVD that can fargli all for the player of DVD X is all-oneregion in free reader DVD to play all the video of HD and DVDs, the films record of DVD, video of the converted one. The player of DVD X supports the Dolby Digital 5,1 (AC-3), the system of the theatre of Digitahi (DTS), edges of Dolby, multichannel decoding till 7.1 rabbits. This reader DVD of DTS can transform your PC in the domestic theatre leaves, it to perceive the colder enjoyment of audience. The version of free test is available, next to load programs object and to have a test. You will love it to the sure
