Why is Rugged Computers Used in the First Place?

by Angie Turner

Article published on June 23rd 2012 | Computer

The widespread use of rugged computers has once again thrown light on one typical question, i.e. what prompts the user to opt for this option in the first place?

The answer to this question can be seen in the advantages the rugged computers offers. For instance, the designing of these computers are done in such a manner that when it comes to its operational part, it has enough potential to perform even in harsh conditions. Some of the commonly prevalent weather conditions are continuous vibrations, harsh temperatures, wet conditions or dusty conditions.

The ability to withstand extreme conditions has earned rugged laptop computers worldwide applause. There are many organizations that depend on these computers because they are regarded as the best fit to non-traditional environments. It may be noted, there are many elements in the environment that can have a damaging consequences on it. For instance, the computer might get destroyed or become redundant. Hazardous environments, in-field applications and industrial worksites are some of the instances where they are in rampant use.

There are some models of rugged laptop computers that are widely known to have the capacity to bear temperature as low as minus 30 degrees. Such a laptop is of great help for those researchers who carry many different kinds of researches in Antarctica. The researchers who carry their research work in such adverse environmental conditions say that their computer remains unfazed even in rugged conditions. This is in total contrast to what they encounter with traditional varieties of this kind of computer. These devices are prone to suffering damages in harsh conditions. The rugged variety is built in a manner so that it is capable of handling moderate vibrations and shocks. It is because of these reasons that it has received such a widespread use in many sectors like and transportation industries, in retail, manufacturing, healthcare field, agriculture, etc.
