Dell Technical Solutions for Small and Medium Businesses

by Jack K Wilson

Article published on December 20th 2011 | Customer Service

Dell offers matching solutions in diverse ranges from PC, workstation, server, storage to printing for emerging businesses which are reliable and secure. Dell products are highly customized to meet individual business requirements. Dell Vostro, Optiplex and Precision series hold good penetration in the small business and enterprises domains. Powered with 2nd Generation Intel Core processors you can stay combative in a dynamic work environment. Built-in security features as well as extended options for data backup and recovery provide the confidence to manage business data amidst security challenges. Dell DataSafe Online Backup is a robust solution for routine backups of your system data and is easy-to-use as it doesnâ€™t require any hardware installation.

With preinstalled Roxio Creator Starter software, you can simply drag and drop files to encrypt them onto a password-protected CD, DVD or Blu-ray disc. Dell also offers backup solution by means of removable-disk which is ideal for small office backup needs, providing faster transfer rates and recovery, and large capacities. Preinstalled Trend Micro Worry-Free Business Security Services shields your data against malicious Internet threats. Dell servers are available in all ranges starting from initial or entry level business server to Tower Server and Rack Servers to suit your specific business needs. It encompasses simplicity and manageability for rigorously performance.

Apart from offering industriesâ€™ best solutions for business needs, Dell holds expertise under its Dell Support portfolio to provide quick support for all products and technologies. Experts can setup, install and configure PC, workstation, server and backup support devices besides troubleshooting those to fix related issues. Dell has a massive knowledgebase, community support forum and section for downloading drivers and patches. Quick solutions are available for server running on different editions of Windows server operating system, and you can successfully implement different services such as Certification authorities (CAs), CA Web enrollment, Online Responder, Network Device Enrollment Service, Certificate Enrollment Web Service, etc. of the Active Directory on a single or multiple Dell servers.

Experts can successfully configure the Microsoft Exchange Server with your Dell infrastructure so that you can provide reliable, secure and cost-effective messaging system to your employees. Apart from instant text message sharing, users can collaborate through calendar sharing, and can enjoy 5GB mailbox space to keep valuable data and crucial communication.

Navigate to the Dell Help portal, and garner services for your PCs or workstations running on different versions of client Windows operating system. Whether you want to install or repair operating system or any other software, you will find experts standing by your side. You can seek advice to troubleshoot and fix different issues related to software compatibility, Internet connectivity, peripheralsâ€™ settings, viruses and spyware, driver incompatibility, registry settings, e-mail and browser settings, and more. Experts will either instruct you over the phone or will take the remote access of your Dell system to remotely perform troubleshooting on your behalf.

Call on the Dell number to garner effective security solutions to protect your business data. Assessing the security settings they will help in setting up and configuring the Windows Firewall and modifying third-party network layer or application layer firewall for fast packet-screening system that logs and audits information as it passes through.
