Does your business premises require Dry Riser Testing? by [Julia Roger](#)

Article published on December 12th 2011 | [Customer Service](#)

To ensure that a business premises is compliant with health and safety and fire regulations, building managers should ensure they either have a dry or wet riser installed, to distribute water in the event of a fire and to help reduce the chance of a building being badly damaged or employees being hurt.

A dry riser is the preferred option for many companies, and to ensure that a dry riser works to the best of its ability and will provide the right assistance in the event of a fire, dry riser testing is absolutely essential.

Regular dry riser testing is the only way of having the reassurance that a dry riser is functioning as it should be, and failure to carry out frequent dry riser testing could prove to have devastating consequences should a fire break out in a business premises or office block.

Here at Falcon Fire we offer a wide range of dry riser testing and our services are comprehensive, ensuring that every aspect of a dry riser is functioning perfectly and will work as it should in the event of a fire in a building.

We have been carrying out dry riser testing for years, and all of our team has a huge amount of dry riser testing experience, spending their careers working with dry risers, wet risers and a range of other fire protection solutions.

We pride ourselves on being a firm that can provide every aspect of fire protection, and as well as dry riser testing we offer installation, fire extinguishers and hoses. Many of our dry riser testing customers also use our services to get other fire fighting options for their premises, and if you are interested in dry riser testing as part of a wider fire safety solution, let us know.

If you need dry riser testing carrying out and you want to hire a firm with enough experience to be able to tackle any kind of dry riser, in any kind of premises, then get in touch with us today. We are the number one choice for reliable and comprehensive dry riser testing.
