Explore Microsoft Review and Find New Possibilities by Jack K Wilson

Article published on November 30th 2011 | Customer Service

Is your business demanding too much? How to get office job done remotely when you donâ€™t have desired data? Situations are not new, and there is no alternative than to stay productive anywhere anytime. A couple of years back you used to carry data on mail or through some physical mean. There were lots of restrictions regarding security and integrity. And you were unable to share, and work simultaneously. But with the induction of Office Web Apps, dream has come true.

Letsâ€™ explore Microsoft Review and find new possibilities with the product. Well, Microsoft Hotmail and Windows Live Mail are the old companions which you have been using for a long spell to send and share messages, photos and videos. Did you know the same ID can be used to share Word, PowerPoint, Access, and OneNote files? Forgot attaching files with e-mails or carrying clumsy digital storage devices, just you need an Internet access, and thatâ€™s all. You can upload and share Microsoft Office documents with your friends, even if they don't have Microsoft Office. Work seamlessly with Microsoft Office and Stay productive round-the-clock. Learn more in Microsoft Review how skyDrive makes thing happen.

As you chat with online buddies and share photos and other stuffs through social networks, in the similar pattern you can share files with SkyDrive. You can set permissions as whom to give accessibility to your folders and photos. Instead of sending photo attachments that run into size limits, you can email a link to photo albums from SkyDrive. Use the same link to update social network or sync it with your blog sites. Need to work together on certain project? Say the Office word or PowerPoint presentation. Itâ€™s simple and you would be able to use all Office Word or PowerPoint features as well. Visualize changes made to the files by other co-workers, edit simultaneously to bring better result.

See how you can share an Excel file with someone:

â€¢ Open â€œWindows Liveâ€• and point to Office.

â€¢ Select your documents, and then find the Excel file you want to share.

â€¢ Point to the file, click â€œMoreâ€•, click â€œShareâ€•, and then do one of the following:

â€¢ Click â€œEdit permissionsâ€• to give your friends or other people permission to edit the file.

â€¢ Click â€œSend a linkâ€• to email someone a link to open the file on SkyDrive.

â€¢ Click â€œGet a linkâ€• to create a link that will open the file on SkyDrive

Likewise, you can work with other Office applications. In case there is any issue you can navigate to the Microsoft fix it service to resolve that. Live interaction with experts can also help you to manually troubleshoot machine to resolve prevailing issues.

At times, you may need to perform Windows Repair to fix critical issues. Windows Recovery Console is an important tool; it can effectively resolve issues with the corrupted NTFS file system, FAT, and FAT32 volumes without starting the Windows graphical user interface (GUI). If your system doesnâ€™t hold the Windows Recovery Console, you can start the computer and use the Recovery Console directly from Windows XP installation disc.

SkyDrive offers a free-of-cost online storage, which is reliable, secure and perfect for sharing data. It gives you the privilege to access your home or office PC from anywhere using the Windows Live Mesh. Thus, wherever you go your data goes along you.
