Heavy Duty Caster Wheels and its Various Type by [Chris Adam](#)

Article published on February 7th 2012 | [Customer Service](#)

The heavy duty caster wheels are most regularly found at the bottom of various tools. Their main intention is to easily move something heavy on them. This quite advanced technology is most commonly seen with the dollies, chopping carts and hand trucks. It is not just with carriages that the heavy duty caster wheels also, furniture is another area for them. With every passing day, the suitability of these wheels is gaining prominence in production of furniture. Just like the carriages, the wheels in the furniture also are placed in the bottom of them. Bed frames, chairs, trolleys, tables are some of them containing the wheels.

There is another special place where the heavy duty caster wheels are used.. The aged or injured people find it quite stressful and aching while moving up to higher altitudes. This is why the hand trucks and dollies are put into their maximum and apt use. These vehicles make the best use of these wheels. These wheels are rightly suited for such vehicles.

Like all other substances that have come to human use come in various shapes or models, the heavy duty caster wheels are also found in a variety of different shapes, sizes and designs. Based on their site of use, the wheels have their designs. The ones used in the industries are strikingly different from the ones used with furniture. Also, the weight of the wheels used in various different sites varies considerably. This has lead to very easy and simple movement of the heavy substances, regardless of the distance or the altitude to travel. The dependence of the various companies on these vehicles is huge. The activities and functionalities of such vehicles are in an all time high.
