Outsourcing Pros and Cons by [Andrew Parker](#)

Article published on December 29th 2011 | [Customer Service](#)

Build Operate Transfer Services

With ITCube's BOT Service model, you get the benefit of a trusted local partner to setup your subsidiary efficiently for a time period. After the completion of the decided span, we transfer the assets and handover the operations along with manpower to you. In other words, we create a dedicated offshore development center for your growing business requirements. Added to this, you also get support of innovative and cost-effective solutions for your expansion plans.

ITCube BPO with its unparalleled Flexibility and Scalability has supported numerous clients with the BOT model. We have provided each of our clients with a quality package of People, Process and Technology tailor made to suit their business needs. Apart from a swift startup to your operational needs, we provide you the most cost effective and proficient solutions.

ITCube BPO will become an extension of your business operations wherein you get all the benefits of outsourcing with the option of retaining total control. We will execute your operations using the best technology available and when you are ready, we gradually transfer the ownership of the complete operations to you. You control the projects and the allocation of skills – our skilled and competent technologists become your employees, a permanent extension of your staff, fully integrated into your corporate culture.

With our Build Operate Transfer Outsourcing & Offshore model we maintain complete transparency, efficiency and quality with a smooth flow of work. We help you achieve your business objectives under your directions. During the transfer stage, you have the option to retain the same individuals together with the complete processes that brought positive results.
