Stainless steel bolts | carriage bolts by Riley Poole

Article published on February 18th 2012 | Customer Service

When youâ€™re ready to start your home improvement project, youâ€™ll need supplies. Youâ€™ll need reliability and extensive, thorough collections of fasteners to make sure you have the right pieces for your work. LTS Supply is the fastener store that holds your projects together and lets them last through the years. We have stainless steel screws and stainless steel bolts. The stainless steel gives them great durability and resilience against elements. It also gives them a classier and brighter appearance.

Donâ€™t know the difference between bolts and screws? Washers and nuts? Stainless steel bolts and screws, and then self-tapping screws, or carriage bolts, or standard bolts? Donâ€™t know what a â€œregu bolt is? LTS Supply employees do know their stuff and can help you through any sticky situation if you canâ€™t seem to determine which type of screw or bolt is appropriate for your job. Thereâ€™s no nee to feel embarrassed for not knowing. This is where you begin, with experts who know, and who can lead you to the carriage bolt you need, and who can suggest the stainless steel bolt you might want as opposed to another type of material for your fastener. We know materials, the fasteners, and the situations in which you would use each fastener.

We sell our products with an easy online catalog that allows you to log in with a user name and make your purchases with simple clicks of the mouse. You can see at the left of the screen, all of our categories: Socket Screw, Washers, Set Screw, Pins, Nuts, Cap Screw, Screws, Bolts, and Keys. These are easy enough. Within the sections, you can specify down to â€œCarriage bolt,â€• for example, or â€œStainless steel screw,â€• and then make your selections. Thereâ€™s really nothing else t

With your carriage bolts, you can do a number of different projects that self-tapping screws would not satisfy. Many people new to remodeling and fixing things themselves donâ€™t know the difference between a simple bolt and screw. They might not realize that theyâ€™re purchasing the wrong fastener for a project when they pick up a stainless steel bolt and they really wanted a carriage bolt. Or they pick up a carriage bolt but really should have had a self-tapping screw. LTS will help you with that. Our motto is not just â€œfasteners for any job,â€• but further, itâ€™s â€œFasteners for EVERY job.â€• W even if youâ€™re not thinking of it or donâ€™t need it.
