Toilet Paper Rolls by Hilton Thomas

Article published on July 14th 2012 | Customer Service

Little things in life make a huge difference in our lives and one such little thing is the Toilet paper Rolls. Toilet paper rolls need to be functional but at the same time can also be stylish to suit the dÃ©cor of your restroom. You can get classic designs of Toilet Paper dispensers to contemporary style roll holders, most of them have the toilet paper just roll out. Toilet roll holders come in a wide variety of materials like brass, stainless steel, porcelain and chrome plated to match the modern bathroom fixtures.

Toilet roll dispensers are also known as toilet holders, they hold toilet paper rolls. A horizontal ones can cover the roll, but the ones found in restaurants, homes and schools are those that are easy to refill, and are mounted onto the wall. With the advancement in technology, you can now have an iPod toilet roll hold and a docking station to listen to your favourite music while in the bath tub, shower or in the spa. A toilet holder in public toilets is designed differently so that no one can steal the holder, they are permanently fixed and where you can use large rolls to make it more economical to refill.

Whenever you want to get toilet rolls, it is best to opt for dispensers that hold more. Most homes have a standard toilet tissue dispenser; easy to refill and require less maintenance. Other dispensers may be designed to hold specialised large jumbo rolls which might have smaller sheets to last longer, so less refills. When choosing toilet paper, you need to select rolls that fit your dispenser in the rest room. Toilet paper rolls come in various shapes and sizes. Door and wall mounting dispensers are great for smaller tight areas and these are available in chrome finish or brass. Dispensers are available with or without the hinged hood.

Toilet paper comes in different ply, some are available in single ply, these rolls are thinner and it makes them compact but more expensive. There is more usage of the paper to provide a proper clean. Two ply toilet rolls have double the thickness, they provide better absorption, they may cost more but less paper is used and they last longer because of their strength to absorb. A major consideration should be the overall feel of the tissue. Most bathroom tissue should decompose and degrade when flushed, and the soft toilet rolls are gentle on the skin. Softer tissue comes with a higher price tag but those who value texture prefer to pay the price for its quality.

Ultimately, it is your choice; there is no right or wrong toilet paper. It all depends on whether you want it for commercial or home use, the type of toilet dispenser you have and the one which suits your budget. Large businesses look for generic brands to save on costs. Toilet rolls are a product most people take for granted; very few who will understand its importance until they run out of it. Supply Line Direct is considered as a great storehouse for toilet paper rolls and toilet roll dispensers. Check out the collection and order online for the same.
